

Bio Basics™ GRANULAR HUMIC ACID

Greens / Fairway Grade

Humic Acids 70%

Bio Basics Granular Humic Acid is derived from Leonardite ore that is rich in humic acid. This ore is one of the highest concentrated ore that has both Humic and Fulvic acids. Humic Acids are a family of water-soluble organic acids that are naturally present in soil organic matter, which improves the plants ability to take in vital nutrients.

Benefits:

- Stimulates microbial activity
- Enhances the uptake of nutrients
- Enhances root development
- Improves soil structure
- Enhances germination
- Better resistance to stress
- Promotes residue (thatch) reduction
- Promotes healthier stronger plants

Application Rates:

- 10 lbs. per 1000 on sand base greens – 2 times per year (spring/fall)
- 8 lbs. per 1000 on push up greens – 2 times per year
- 6 lbs. per 1000 for fairway/rough application
- For best results – Incorporate during aeration to get soil contact with humate.
- Available in 50 lb. bags.
