

STABIL-N

***Ace out the competition
by holding a higher
concentration of nitrogen
in the root zone!***

Stabil-N is formulated to maintain available nitrogen levels in the soil for up to 14 days. Stabil-N aids in reducing the potential loss of nitrogen caused by environmental factors. Unlike its competitors, Stabil-N conserves nitrogen in a plant useable form while releasing nutrients to feed your turf and soil.

Applying Stabil-N with nitrogen based fertilizers eliminates the risk of losing vital nutrients your turf needs to grow. Stabil-N increases the efficacy of nutrient uptake, eliminating the need for over-applying fertilizer. Stabil-N is blended to ease the flow of the treated fertilizer to ensure a uniform application. Stabil-N is labeled for use with nitrogen based granular and solution fertilizers.

Broadcast Application: Apply 1-2 qt/ton Stabil-N

	APPLICATION RATES		
	5-7 Days Control	8-10 Days Control	14 Days Control
Urea	2.0 qt/ton	3.0 qt/ton	4.0 qt/ton
UAN 28%	1.0 qt/ton	1.5 qt/ton	2.0 qt/ton
UAN 30%	1.5 qt/ton	2.0 qt/ton	2.0 qt/ton
UAN 32%	1.5 qt/ton	2.0 qt/ton	2.0 qt/ton

ACTIVE INGREDIENTS
Calcium Aminoethylpiperazine
Calcium Heteropolysaccharides
